# Massachusetts Department of Public Health COVID-19 Dashboard- Wednesday, September 09, 2020

## Dashboard of Public Health Indicators

Percent or Count of Change Since Lowest Observed Value (LOV)

7 Day Weighted Average of Positive Molecular Test Rate\*

0 %

LOV = 0.8%

3 Day Average of Number of COVID-19 Patients in Hospital\*\*

9 %

LOV = 302

Number of Hospitals using Surge Capacity

3

LOV = 0

3 Day Average of COVID-19 Deaths\*\*\*

0 %

LOV = 7

\*Calculated from total molecular tests; \*\*Includes both confirmed and suspected cases of COVID-19; \*\*\*Includes deaths in only confirmed cases of COVID-19

Note: Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data previously reported. As of 9/8/20, patients on an observation stay with confirmed or suspected COVID are included in total COVID hospitalization figures in addition to patients who are admitted. This update will create consistency in reporting and provide a more complete picture of total COVID hospitalizations. Most hospitals were already including observation status patients in their reporting, so this update is not expected to have a significant impact on daily trends. LOV = Lowest observed value, i.e. the lowest value the public health indicator has been since tracking started.

# Glossary of Terms

Please Note: the following terms and definitions apply to COVID-19 only.

**COVID-19 Molecular Test:** Also known as a PCR test. This diagnostic test identifies the presence of virus's genetic material. These tests are very accurate and a positive result means someone has current or very recent infection.

**COVID-19 Antigen Test:** This test identifies the presence of proteins on the surface of the virus. These diagnostic tests are somewhat less accurate (i.e., low sensitivity) than molecular tests but a positive result is suggestive of current infection.

**COVID-19 Antibody Test:** Also known as a serology test. This test identifies antibodies; antibodies are the proteins produced by the immune system to fight off an infection. Because antibodies take days to weeks to make after infection, a positive result indicates infection at some point in the past. It is not a diagnostic test.

**Testing by Date:** This refers to the date the sample (usually nasal swab or blood) was taken. Most reports and figures in this dashboard use this date.

**Total Tests:** This represents the total number of tests done and includes people who have had multiple tests.

**Persons Tested:** This represents the total number of persons who had at least one test done. If a person had more than one test, they are still counted only once.

**Case Definition:** A standard set of criteria (including symptoms, laboratory tests and exposure) used to count persons who may have COVID-19. Case definitions tell public health professionals which people with disease to count; they don't tell healthcare providers how to diagnose or treat COVID.

**Confirmed Case:** A person is counted as a confirmed case of COVID-19 if they have a positive molecular test.

**Probable Case:** A person is counted as a probable case in three ways:

1. if they have a positive antigen test;
2. if they have COVID symptoms AND were exposed to someone with COVID;
3. if they died and their death certificate lists COVID as a cause of death.

More complete information about the COVID-19 case definition may be found here: [https://cdn.ymaws.com/www.cste.org/resource/resmgr/ps/positionstatement2020/Interim-20-ID-02\\_COVID-19.pdf](https://cdn.ymaws.com/www.cste.org/resource/resmgr/ps/positionstatement2020/Interim-20-ID-02_COVID-19.pdf)

**Suspected Hospitalized Cases:** Patients without a laboratory confirmed COVID-19 diagnosis but who, as determined by the hospital, have signs and symptoms compatible with COVID-19 (most patients with confirmed COVID-19 have developed fever and/or symptoms of acute respiratory illness, such as cough, shortness of breath, or myalgia/fatigue).

# Daily and Cumulative Confirmed Cases

Confirmed COVID-19 Cases To Date by Date Individual Tested

● New Confirmed Cases ● Cumulative Confirmed Cases

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health. Note: all data are current as of 8:00am on the date at the top of the page; Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete.

# Testing by Date - Molecular (Individuals)

Total Number of Individuals with at Least One Molecular Test Performed by Date

● New Individuals Tested by Molecular Method ● Cumulative Individuals Tested by Molecular Method

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.  
 Note: all data are current as of 8:00am on the date at the top of the page. Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. Testing by Date - Molecular (Individual) counts the number of individuals with at least one molecular test; Testing by Date - Molecular (Total Tests Conducted) counts the total number of molecular tests performed. This includes individuals who have had more than one molecular test.

# Testing by Date - Molecular (Total Tests Conducted)

Total Number of Molecular Tests Performed by Date

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.

Note: all data are current as of 8:00am on the date at the top of the page. Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. Testing by Date - Molecular (Individual) counts the number of individuals with at least one molecular test; Testing by Date - Molecular (Total Tests Conducted) counts the total number of molecular tests performed. This includes individuals who have had more than one molecular test.

# Testing by Date - Molecular (Percent Positive)

Percent of Tests By Molecular Method that are Positive by Test Date

● Percent of Tested Individuals who are Positive ● Percent of All Molecular Tests that are Positive

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.  
 Note: all data are current as of 8:00am on the date at the top of the page. Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete; this graph is lagged by one day as a result. Percent of Tested Individuals who are Positive counts the number of individuals with at least one molecular test; Percent of all Molecular Tests that are Positive counts the total number of molecular tests performed. This includes individuals who have had more than one molecular test.

# Daily and Cumulative COVID-19 Hospitalizations

Patients Reported as Hospitalized with COVID-19 by Date

● New Hospitalizations by Date ● Number of Hospitalized COVID-19 Patients by Date

**COVID-19 Cases  
Currently  
Hospitalized**

**338**

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.  
 Notes: data are current as of 12:00pm on the date at the top of the page. These data include both confirmed and suspected COVID-19 cases. For purposes of this reporting, "confirmed" are cases with a PCR test. "Suspected" are those with symptoms who have not had a test result yet. Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data reported previously. As of 9/8/20, patients on an observation stay with confirmed or suspected COVID are included in total COVID hospitalization figures in addition to patients who are admitted. This update will create consistency in reporting and provide a more complete picture of total COVID hospitalizations. Most hospitals were already including observation status patients in their reporting, so this update is not expected to have a significant impact on daily trends.

# New Daily COVID-19 Hospital Admissions

Confirmed and Suspected COVID-19 Hospital Admissions by Day

● Confirmed COVID-19 Hospital Admissions ● Suspected COVID-19 Hospital Admissions

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.  
 Notes: data are current as of 12:00pm on the date at the top of the page. For purposes of this reporting, "confirmed" are cases with a PCR test. "Suspected" are those with symptoms who have not had a test result yet. Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data reported previously. <sup>10</sup>

# Daily and Cumulative COVID-19 ICU and Intubations

## Patients Reported in ICU with COVID-19 by Date

Count of Cases Currently in ICU

# 49

## Patients Reported as Intubated with COVID-19 by Date

Count of Cases Currently Intubated

# 21

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.  
 Notes: data are current as of 12:00pm on the date at the top of the page. Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data reported previously.

# Daily and Cumulative Deaths

Total Deaths\* in COVID-19 Cases by Date of Death

● New Confirmed Deaths ● New Probable Deaths ● Total Deaths

Total Deaths in COVID-19 Cases  
**9,146**

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Tables and Figures created by the Office of Population Health  
 Note: all data are current as of 8:00am on the date at the top of the page; \*Counts on the trend chart do not match total number of deaths reported, as there is a several day lag in reporting by date of death. Includes both probable and confirmed cases. For confirmed and probable case definitions, please see the Glossary on p. 4.

# Daily and Cumulative County Data

| County       | New Confirmed Cases Reported Today | Cumulative Confirmed Cases To Date |
|--------------|------------------------------------|------------------------------------|
| Barnstable   | 1                                  | 1,663                              |
| Berkshire    | 4                                  | 676                                |
| Bristol      | 9                                  | 9,418                              |
| Dukes        | 1                                  | 58                                 |
| Essex        | 23                                 | 18,454                             |
| Franklin     | 0                                  | 396                                |
| Hampden      | 4                                  | 7,793                              |
| Hampshire    | 0                                  | 1,191                              |
| Middlesex    | 55                                 | 25,847                             |
| Nantucket    | 0                                  | 46                                 |
| Norfolk      | 12                                 | 9,716                              |
| Plymouth     | 15                                 | 9,257                              |
| Suffolk      | 43                                 | 22,831                             |
| Unknown      | 3                                  | 372                                |
| Worcester    | 12                                 | 13,678                             |
| <b>Total</b> | <b>182</b>                         | <b>121,396</b>                     |

| County              | New Confirmed and Probable Deaths Reported Today | Cumulative Confirmed and Probable Deaths To Date |
|---------------------|--|--|
| Barnstable          | 0  | 169  |
| Berkshire           | 0  | 46   |
| Bristol             | 0  | 668  |
| Dukes and Nantucket | 0  | 1  |
| Essex               | 2  | 1,256  |
| Franklin            | 0  | 66   |
| Hampden             | 0  | 759  |
| Hampshire           | 0  | 141  |
| Middlesex           | 2  | 2,089  |
| Norfolk             | 0  | 1,026  |
| Plymouth            | 0  | 747  |
| Suffolk             | 0  | 1,111  |
| Unknown             | 0  | 5  |
| Worcester           | 1  | 1,062  |
| <b>Total</b>        | <b>5</b>   | <b>9,146</b>                                     |

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Tables and Figures created by the Office of Population Health  
 Note: all data are current as of 8:00am on the date at the top of the page. Includes both probable and confirmed cases. For confirmed and probable case definitions, please see the Glossary on p. 4.

# Deaths by Sex, Previous Hospitalization, & Underlying Conditions

Total Deaths by Sex+

Total Deaths with a Previous Hospitalization\*

Total Deaths\*\* with Underlying Conditions

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital survey; Tables and Figures created by the Office of Population Health.  
Note: all data are cumulative and current as of 8:00am on the date at the top of the page; \*Hospitalized at any point in time, not necessarily the current status; \*\*Only includes data from deaths following completed investigation, figures are updates as additional investigations are completed; + Excludes unknown values. Includes both probable and confirmed cases.

# Cases, Hospitalizations, & Deaths by Race/Ethnicity

The following caveats apply to these data:

1. Information on race and ethnicity is collected and reported by laboratories, healthcare providers and local boards of health and may or may not reflect self-report by the individual case.
2. If no information is provided by any reporter on a case's race or ethnicity, DPH classifies it as missing.
3. A classification of unknown indicates the reporter did not know the race and ethnicity of the individual, the individual refused to provide information, or that the originating system does not capture the information.
4. Other indicates multiple races or that the originating system does not capture the information.

**Note:** COVID-19 testing is currently conducted by dozens of private labs, hospitals, and other partners and the Department of Public Health is working with these organizations and to improve data reporting by race and ethnicity, to better understand where, and on whom, the burden of illness is falling so the Commonwealth can respond more effectively. On 4/8, the Commissioner of Public Health issued an Order related to collecting complete demographic information for all confirmed and suspected COVID-19 patients.

Total Cases by Race/Ethnicity

Total Case Count

Total Cases Reported as Hospitalized\* by Race/Ethnicity

Total Cases Reported as Hospitalized

Total Deaths by Race/Ethnicity

Total Deaths

● Hispanic ● Non-Hispanic Asian ● Non-Hispanic Black/African American ● Non-Hispanic Other ● Non-Hispanic White ● Unknown/Missing

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital survey; Tables and Figures created by the Office of Population Health. Note: all data are cumulative and current as of 8:00am on the date at the top of the page;

\*Hospitalization refers to status at any point in time, not necessarily the current status of the patient/demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital surveys. Includes both probable and confirmed cases.

# COVID-19 Cases in Long-Term Care (LTC) Facilities

Residents/Healthcare Workers of  
Long-Term Care Facilities with  
Probable or Confirmed COVID-19

**24,671**

Long-Term Care Facilities  
Reporting At Least One Probable  
or Confirmed Case of COVID-19

**381**

Probable or Confirmed COVID-19  
Deaths Reported in Long-Term  
Care Facilities

**5,864**

# Probable Case Information

# Testing by Date - Antibody

New Individuals Tested by Antibody Tests  
**262**

Total Individuals Tested by Antibody Tests  
**115,319**

Number of Individuals Tested by Antibody by Test Date

● Individuals with Negative Antibody Tests ● Individuals with Positive Antibody Tests ● Cumulative Patients Tested by Antibody Method

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.  
 Note: all data are current as of 8:00am on the date at the top of the page. Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete. Please note that some individuals have been tested by both molecular and antibody methods.

# Testing by Date - Antigens

New Individuals Tested by Antigen Tests  
**399**

Total Individuals Tested by Antigen Tests  
**95,385**

Number of Individuals Tested by Antigens by Test Date

● Individuals with Negative Antigen Tests ● Individuals with Positive Antigen Tests ● Cumulative Patients Tested by Antigen Method

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.  
 Note: all data are current as of 8:00am on the date at the top of the page. Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete.

# Total Hospital Capacity by Region

Data collected as of 9/8/2020 5:00pm

Massachusetts

- Available Alternate Medical Site Beds
- Available non-ICU Beds (including Surge)
- Available ICU Beds (including Surge)
- Occupied Alternate Medical Site Beds
- Occupied non-ICU Beds
- Occupied ICU Beds

By Region

**Occupancy/ availability as reported by hospitals to DPH.**

Regions shown represent EOHHS Regions. Note that total bed estimates may change day-to-day due to hospitals updating surge planning. As of June 16th, data reflects updated data collection methodology and the removal of unstaffed beds from this analysis. Analysis here reflects total beds that hospitals could staff within 12-24 hours. Note: Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data reported previously. As of 9/8/20, all observation beds and observation status patients will be included in the Available Non-ICU Beds and Occupied Non-ICU Beds categories.

# COVID Patient Census by Hospital (1/3)

Data collected as of 9/8/2020 5:00pm

| Hospital Name                             | Hospital County | Hospitalized Total COVID patients - suspected and confirmed (including ICU) | Hospitalized COVID patients in ICU - suspected and confirmed |
|---|-----------------|---|--|
| Addison Gilbert Hospital                  | Essex           | 0   | 0  |
| Anna Jaques Hospital                      | Essex           | 2   | 0  |
| Athol Memorial Hospital                   | Worcester       | 0   | 0  |
| Baystate Franklin Medical Center          | Franklin        | 0   | 0  |
| Baystate Medical Center                   | Hampden         | 25  | 3  |
| Baystate Noble Hospital                   | Hampden         | 0   | 0  |
| Baystate Wing Hospital                    | Hampden         | 3   | 0  |
| Berkshire Medical Center                  | Berkshire       | 1   | 0  |
| Beth Israel Deaconess Hospital - Milton   | Norfolk         | 5   | 1  |
| Beth Israel Deaconess Hospital - Needham  | Norfolk         | 5   | 1  |
| Beth Israel Deaconess Hospital - Plymouth | Plymouth        | 17  | 0  |
| Beth Israel Deaconess Medical Center      | Suffolk         | 13  | 1  |
| Beverly Hospital                          | Essex           | 4   | 0  |
| Boston Childrens Hospital*                | Suffolk         | 7   | 2  |
| Boston Medical Center                     | Suffolk         | 32  | 1  |
| Brigham and Womens - Faulkner             | Suffolk         | 6   | 1  |
| Brigham and Womens Hospital               | Suffolk         | 10  | 2  |
| Brockton Hospital                         | Plymouth        | 3   | 0  |
| Cambridge Hospital                        | Middlesex       | 18  | 4  |
| Cape Cod Hospital                         | Barnstable      | 1   | 0  |
| Carney Hospital                           | Suffolk         | 2   | 0  |
| Clinton Hospital                          | Worcester       | 0   | 0  |
| Cooley Dickinson Hospital                 | Hampshire       | 1   | 0  |

Occupancy/ availability as reported by hospitals to DPH; \*Specialty hospital data may be delayed and patient composition may vary.

Note: Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data reported previously. As of 9/8/20, patients on an observation stay with confirmed or suspected COVID are included in total COVID hospitalization figures in addition to patients who are admitted. This update will create consistency in reporting and provide a more complete picture of total COVID hospitalizations. Most hospitals were already including observation status patients in their reporting, so this update is not expected to have a significant impact on daily trends.

# COVID Patient Census by Hospital (2/3)

Data collected as of 9/8/2020 5:00pm

| Hospital Name                        | Hospital County | Hospitalized Total COVID patients - suspected and confirmed (including ICU) | Hospitalized COVID patients in ICU - suspected and confirmed |
|--------------------------------------|-----------------|---|--|
| Dana Farber Cancer Institute*        | Suffolk         | 0   | 0  |
| Emerson Hospital                     | Middlesex       | 2   | 0  |
| Fairview Hospital                    | Berkshire       | 0   | 0  |

Occupancy/ availability as reported by hospitals to DPH; \*Specialty hospital data may be delayed and patient composition may vary.

Note: Hospital-reported data included here reflects a transition to new federal reporting standards imposed as of 7/22. As a result, data may not be directly comparable to hospital data reported previously. As of 9/8/20, patients on an observation stay with confirmed or suspected COVID are included in total COVID hospitalization figures in addition to patients who are admitted. This update will create consistency in reporting and provide a more complete picture of total COVID hospitalizations. Most hospitals were already including observation status patients in their reporting, so this update is not expected to have a significant impact on daily trends.

# COVID Patient Census by Hospital (3/3)

Data collected as of 9/8/2020 5:00pm

| Hospital Name                         | Hospital County | Hospitalized Total COVID patients - suspected and confirmed (including ICU) | Hospitalized COVID patients in ICU - suspected and confirmed |
|---------------------------------------|-----------------|---|--|
| Milford Regional Medical Center       | Worcester       | 0   | 0  |
| Morton Hospital                       | Bristol         | 2   | 1  |
| Mount Auburn Hospital                 | Middlesex       | 4   | 0  |
| Nantucket Cottage Hospital            | Nantucket       | 0   | 0  |
| Nashoba Valley Medical Center         | Middlesex       | 0   | 0  |
| New England Baptist Hospital          | Suffolk         | 0   | 0  |
| Newton-Wellesley Hospital             | Middlesex       | 1   | 0  |
| North Shore Medical Center Salem      | Essex           | 6   | 1  |
| Norwood Hospital                      | Norfolk         | 0   | 0  |
| Saint Vincent Hospital                | Worcester       | 4   | 0  |
| Saints Memorial Medical Center        | Middlesex       | 1   | 0  |
| South Shore Hospital                  | Norfolk         | 15  | 0  |
| Southcoast Charlton Memorial Hospital | Bristol         | 2   | 1  |
| St Annes Hospital                     | Bristol         | 0   | 0  |
| St Elizabeths Medical Center          | Suffolk         | 1   | 0  |
| St Lukes Hospital                     | Bristol         | 7   | 2  |
| Sturdy Memorial Hospital              | Bristol         | 4   | 1  |
