## Weekly COVID-19 Vaccination Report

The Weekly COVID-19 Vaccination Report includes the most
currently available information on vaccines shipped and administered, as well as more granular information by geography, demographic factors, and more. This report will be posted each

Thursday.

An important note regarding vaccination progress (Source: CDC, 5/19)

- MA currently ranks 2 nd out of US states for persons with $1+$ doses administered per capita - MA currently ranks 1st for persons with $1+$ doses per capita amongst states with 5M people or more

[^0]
## Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, May 20, 2021

## Critical definitions

Please note: the following terms and definition apply to COVID-19 only. Updated 3/5/2021.
Doses administered: Doses of vaccine that have been given to people by providers. All doses, including the 1st and 2nd doses of a 2 -dose vaccine and the 1 st and only dose of a 1 -dose vaccine, are included in this measurement. Duplicate patient records may be created when patient information is not entered consistently. Data include doses administered by MA providers as well as through the Federal Pharmacy Partnership for Long-term Care Program and the retail pharmacies in the jurisdictional transfer program and Community Health Centers (CHCs) receiving vaccine from the U.S. Health Resources and Services Administration (HRSA). Some doses are administered as part of a separate
federal distribution system and would not be included here.
Doses shipped: Doses of vaccine that have been shipped to providers. All doses, including the 1 st and 2 nd doses of a 2 -dose vaccine and the 1 st and only dose of a 1 -dose vaccine, are included in this measurement. Data include doses shipped to MA providers as well as through the Federal Pharmacy Partnership for Long-term Care Program and the retail pharmacies in the jurisdictional transfer program and CHCs receiving vaccine from HRSA. Some doses are shipped as part of a separate federal distribution system and would not be included here.

Individuals fully vaccinated: An individual is counted as fully vaccinated if they have received the number of doses required to complete the COVID-19 vaccine series. This is measured as the total number of 2nd doses of Moderna and Pfizer administered and reported plus the total number of Janssen/Johnson \& Johnson doses administered and reported.

Individuals with at least 1 dose: An individual is counted as having at least 1 dose if they have received one or more doses of vaccine. This is measured as the total number of 1 st doses of Moderna and Pfizer vaccine administered and reported, plus the total number of Janssen/Johnson \& Johnson doses administered and reported.

MIIS: Immunization data from most (but not all) providers in Massachusetts are reported into the Massachusetts Immunization Information System (MIIS) through direct messages from electronic health records or direct entry by users. Due to inputting and processing, it may take 24-48 hours or more for shipping or administration data to appear in MIIS. MIIS data are available for analysis one calendar day after they are reported to the MIIS. Data are current as of time of publication and may be subject to change in future publications as additional data are reported.

Tiberius: Tiberius is a federal data platform which integrates data on COVID-19 vaccine including vaccine allocation and shipment data for pharmacies in the Federal Pharmacy Partnership Program and the jurisdictional transfer program for retail pharmacies as well as shipments through HRSA for CHCs.

Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, May 20, 2021

## Total COVID-19 Vaccine Doses Administered

Data as of May 18, 2021
Doses administered and reported in the last 45 days

Note: Data from MIIS (see "definitions"). Data reflect doses administered (see "definitions"), including Janssen/Johnson \& Johnson beginning on $3 / 5 / 21$. All doses, including the 1 st and 2 nd doses of a 2-dose vaccine and the 1st and only dose of a 1-dose vaccine, are included in this measurement. Dates reflect the date doses were administered.

Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, May 20, 2021

## Total Individuals Fully Vaccinated

Data as of May 18, 2021
Individuals fully vaccinated and reported in the last $\mathbf{4 5}$ days

NOTE: Data from MIIS (see "definitions"). Data reflect individuals fully vaccinated (see "definitions"), including with Janssen/Johnson \& Johnson beginning on $3 / 5 / 21$; this is measured as the total number of 2nd doses of Moderna and Pfizer administered and reported plus the total number of Janssen/Johnson \& Johnson doses administered and reported. Some individuals may receive a first or second dose of Moderna or Pfizer from a non-reporting provider and would not be included as fully vaccinated. Dates reflect the date doses were administered.

Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, May 20, 2021

## Doses of COVID-19 Vaccine Shipped to Massachusetts

Data as of May 18, 2021
Doses shipped to Massachusetts in the last 45 days

[^1] 2-dose vaccine and the 1st and only dose of a 1-dose vaccine, are included in this measurement

## Cumulative COVID-19 Vaccine Doses Shipped to Massachusetts Providers by County of Provider

Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, May 20, 2021

## Cumulative COVID-19 Vaccine Doses Shipped to Massachusetts Providers by County of Provider as a Percent of County Population

Data as of May 18, 2021

# Cumulative Percentage of Individuals with at Least One Dose Administered by County of Resident Address 

## Data as of May 18, 2021

27\%
15\%
10\%

Data from MIIS (see "definitions"). Data reflect doses administered and reported (see "definitions"), including Janssen/Johnson \& Johnson beginning on $3 / 5 / 21$. An individual is counted as partially vaccinated if they have received only the 1st dose of a two-dose vaccine (currently Moderna and Pfizer). An individual is counted as fully vaccinated if they have received the 2 nd dose of Moderna or Pfizer or have received a dose of Janssen/Johnson \& Johnson vaccine. These are mutually exclusive populations. Some individuals may receive a first or second dose of Moderna or Pfizer from a non-reporting provider and would not be included as fully vaccinated. These proportions use Donahue population estimates from 2019. The difference in the MA state population totals created by summing the age or sex categories and by summing the race categories is expected due to the manner in which the estimates were created; the discrepancy is due to unknown races and small, compounded rounding. As of 5/20/21, the 0-19 years population category was split into 12-15 and 16-19 years to more closely reflect the population currently eligible for vaccines. 0-11 year old population not included as not currently eligible for any formulation.

NOTE: Data from MIIS (see "definitions"). Data reflect doses administered (see "definitions"), including Janssen/Johnson \& Johnson beginning on $3 / 5 / 21$. MIIS includes multiple practice types which have been collapsed into the most frequent practice types for reporting here (see next page); some providers may have been recategorized based on information from providers indicating that they fall in other categories, Employee and occupational health programs at healthcare or correctional facilities are reported by facility type. CVS and Walgreens are administering vaccines as part of both the Federal Pharmacy Partnership Program for Long-Term Care (FPPP) and through retail pharmacies. As of $4 / 21 / 21$, all other retail pharmacies and commercial pharmacies are reported under Other Pharmacy.

## Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, May 20, 2021

## Practice Types

## Practice types

- Hospital includes Hospital (public) and Hospital (private)
- Employee health

Individuals with at least one dose as \% of population is calculated as cumulative first doses of Moderna and Pfizer administered and reported plus the cumulative doses of Janssen/Johnson \& Johnson doses administered, divided by the population in the county and the age category

[^2]
# Individuals with at least one dose administered by county and age group (2 of 2) 

Data as of May $18^{\text {th }}$
XX Doses as \% of people in age group
(XX) Estimate of total population in county by age

* Vaccination figures suppressed where less than 30 persons are included for privacy

Individuals with at least one dose as \% of population is calculated as cumulative first doses of Moderna and Pfizer administered and
reported plus the cumulative doses of Janssen/Johnson \& Johnson doses administered, divided by the population in the county and
the age category

[^0]:    Please note: This report reflects data available in the Massachusetts Immunization Information System (MIIS) as of Tuesday at 11:59PM and is pulled every Wednesday. Due to provider reporting of administration data and data processing, data may be available in MIIS 24-48 hours or more after administration. Due to time needed for inputting shipment data, shipment data may be available in MIIS 24-48 hours or more after shipment. MIIS data are available for analysis one calendar day after they are reported to the MIIS. Data are current as of time of publication and may be subject to change in future publications as additional
    data are reported. All data are from MIIS unless otherwise noted.
